

MHM Load Bank 2

7.5kVA Generator Portable Load Bank Tester

This portable dual voltage generator load bank is an essential piece of generator test equipment, designed to offer portable, easy, simple and efficient voltage, frequency and amperage load testing of a generator.

All pictures are for illustration purposes only, actual machines supplied may differ in appearance and specification.

IMPORTANT NOTE: This load bank tester will load and test the generator. No further equipment is required.

Tests up to **7.5kVA**

Features

Maximum test load: 7.5kVA / 6kW (230v + 110v)

Load bank tester displays voltage (v), frequency (Hz) & amperage (A) under both load and no-load conditions

Lightweight, portable, housed in secure box and complete with carry handle

Plug and play connectivity

Benefits

Ideal to load & test a fleet of generators up to 7.5kVA

Allows test engineer to ensure correct setting of generator

Ideal for workshop or mobile engineer

Load bank comes complete with 1 x 230v (32A – 1.5m) + 1 x 110v (32A – 1.5m) generator to load bank test leads

Specifications

Test Performance

Single Phase Power (110v) 7.5kVA/ 6kW

Single Phase Power (230v) 7.5kVA/ 6kW

Three Phase Power (400v)

N/A

Dimensions

Length: 495 mm

Width: 220 mm

Height: 550 mm

Weight: 12 kg

Test Leads Configuration (1.5m)
