

MHM LOAD BANK 4

125kVA Generator Portable Load Bank

This portable multi-voltage generator load bank is an essential piece of generator test equipment, designed to offer portable, easy, simple and efficient voltage, frequency and amperage load testing of a generator.

Tests up to
125kVA

Features

Maximum test load:
3ph (400v) = 125kVA / 100kW
1ph (230v) = 35kVA / 28kW
1ph (110v) = 9kVA / 7kW

Load bank tester displays voltage (v), frequency (Hz) & amperage (A) under both load and no-load conditions

Portable unit, complete with 4 x castor wheels and 1 x handle

Plug and play connectivity

Benefits

Ideal to load & test a fleet of generators up to 125kVA

Allows test engineer to ensure correct setting of generator

Ideal for workshop or mobile engineer

Load bank comes complete with 1 x 400v (125A – 1.5m) + 1 x 230v (125A – 1.5m) generator to load bank test leads

IMPORTANT NOTE: This load bank tester will load and test the generator. No further equipment is required.

Specification

Performance

Single Phase Power (110V)	9kVA/ 7kW	Single Phase Power (230V)	35kVA/ 28kW
		Three Phase Power (400V)	125kVA/ 100kW

Dimensions

Length: 1040 mm	Width: 670 mm	Height: 940 mm	Weight: 123 kg
-----------------	---------------	----------------	----------------

Hardwire Configuration	3ph (400V)	1ph (230V)	1ph (110V)
MHM Load Bank 4	Hardwire	Hardwire	Hardwire
