

VT2 7m

The VT-2 is a very compact, versatile lighting tower, featuring a 7m vertical, manually operated mast coupled to a useful 6.0kVA super-silenced diesel generator. It is fitted with four 400-watt metal halide lamps, with secure and adjustable height stabilisers - all tested in wind speeds of 80km/h.

Site-tow trailer version

Features

- > A fully bunded fuel tank
- > The fuel tank can be fitted with a unique fuel float system which ensures that only clean fuel is used, resulting in fewer site breakdowns and less service engineers on the road
- > Enhanced soundproofing and noise reduction, helping to lower residual site noise pollution
- > Maximum height 7meters
- > Low fuel shutdown
- > Useable by a single operator
- > 6kva Yanmar Silent diesel generator
- > 31 Litre Fuel Tank
- > Telescopic stainless steel mast
- > 2 height adjustable stabilizers
- > Certified wind stability up to 80 Km/h
- > Manual winch mast erection system with automatic brake, max. load capacity 500 Kg with 133 wires stainless steel
- > 4 floodlights 400W metal halide
- > Lamps complete with bulbs
- > N°2 single phase outlets 230V
- > Central lifting hook
- > Trolley complete with handles and wheels
- > It is possible to use this design only as a generating set
